About Me

Computer Science student specializing in **Full-stack web development** and AI integration. Skilled in **MERN Cloud platforms**, and building real-world tech solutions using modern tools and frameworks.

EDUCATION

KHWAJA MOINUDDIN CHISTI LANGUAGE UNIVERSITY LUCKNOW   **NOV 2022-2026**

Bachelor of Technology(B.tech) In Computer Science Engineering (4th year)

Academic Achievements:
Engineering CGPA : 7.15/10 (6 sem)

Projects

MeetNow(Full Stack React Web Application for Meetings and Video Call)

Developed and deployed a full-stack React web application for online meetings and video calls.This application features integrated real-time chat, authentication, and history, built with WebRTC, Socket.io, MERN stack, and MongoDB, and deployed on Render for version control.

Github: MeetNow   **Render:** MeetNow-at-render

Resume Reviewer Bot – **HTML, CSS, PFMS AI, OpenAI LLM**

Built a responsive web bot that analyzes resumes and provides smart insights using PFMS AI and OpenAI's LLM. Delivers real-time suggestions through an intuitive UI.

Github: Resume- Reviewer-Bot

Portfolio Website – MERN Stack (MongoDB, Express, React, Node.js)

Developed and deployed a personal portfolio website showcasing projects, skills, and experience. Built using the MERN stack with responsive design, hosted on Vercel for fast global access.

Github: Altaf's Portfolio   Vercel:Deployed-Portfolio

Summer Technical Training Program (Dhex Media)   **Sep 2023-Feb 2024**

Skills:AWS,Devops,ML,Python,Generative AI,Prompt Engineering

Projects:

- AI-Powered Cloud Computing using AWS with Custom ML/DL Models Deployed via DevOps and Integrated Generative AI (API/Pipeline).
- AI-Enhanced Cloud Computing with DevOps Pipeline and Python TUI.
- Custom LLM with Real-Time Internet, Advanced Data Processing, and Optimized Prompting

Technical Skills

Development: Full stack development(MERN stack),Android Application(No code tool Fultterflow)
Data Structures and Algorithms: Solved 200+ DSA and Leetcode(CPP)
Cloud:GCP Arcade Standard milestone,created EC2 Instance S3 Buckets and Deployed Web page on AWS
AI&ML: Automation Through python,OpenCV Gesture control,Linear Regression and Biases
